 Les Échappés / The Suspenders

TECHNICAL RIDER :

« *The Suspenders* » is a fully autonomous show. We don't need sound technicians and we can easily and rapidly set up and take down the stage by ourselves.

Sound system : We have our own wireless sound system (with mics) that we can use if necessary. Its battery powered , so no electricity needed for the shows.

That said, if we have to travel by plane, and you can provide the sound system. It can be much easier (and cheaper) to just use yours. If not, we'll simply use ours.

Stage : We don't need an elevated stage or lights or mats for our show. We have our own padded stage surface that we set up for our play space. This lets us play on almost any surfaces, given its levelled and firm enough.

We need a space of at least 16 feet by 20 feet to perform.

And a height of at least 20 feet for some of our acrobatic moves.

For any questions do not hesitate to contact us.
